

Admission **NETWORX.**

part of the TicketLord group

Network Set Up

Admission NetworX network implementation services are able to help organisations to achieve their communications objectives. Admission NetworX can also assist your organisation to operate a cost-effective, superior networking environment.

Admission NetworX network implementation solution consists of a number of services. These complement the design implementation and ongoing management of multi-service communications systems. Admission NetworX services can be provided as a one-off project or as part of an ongoing management service as needs determine.

Event Staff

Admission NetworX provides staff for trade shows, promotions and special events throughout the UK. We work with all companies, from large corporations to small businesses and strive to exceed your expectations. Traveling promotion or a simple weekend event, you can count on the staff from Admission NetworX

Access Control

Making Next Generation Ticketing Possible

Admission NetworX provide Access Control systems to authenticate tickets and monitor attendance with turnstiles or handheld scanners at every entrance. Using Access Control your venue has the tools to enable customers to authenticate their own tickets online using print@home tickets or mobile tickets. Venues can now monitor attendance, investigate no-shows, and create ever more customer-specific marketing and audience building campaigns
